

Week 4: 4.3 Stars | NPS: +61 | ADS: 4.6

CI POV: No variation from W3 in terms of star rating with NPS=+61 (+5 vs W2). Areas of dislike are around the noise of the device and accessories (Oval brush and curlers) performance.

To increase star rating, respondents look for weight reduction, smaller brushes and quieter noise.

- **Scorecard:** Noise and temperature of accessories after usage are the areas of most dissatisfaction ≤ 61%. Attachment/ Detachment of accessories (too hot after usage) and diffuser performance (dissatisfactory) have scored lower than W2.
- The delta between PI unpriced and PI priced shows that testers see the value in our proposition, however the high price point represents a detractor.

Reasons for 5-star experience (N=14)

- Performance (6) -“I am very satisfied with the performance and the action and result, is a lot of fun to blow-dry and style my hair”
 - Aesthetic (4)
 - Lightweight (3) – “The daily use is a pleasure. The hair is quickly dry and styled. Handling is very easy. Light by weight”
- Storage (2)
 - Handling (2)
 - Versatile (2)
 - Easy to use (1)
 - Saves time (1)
 - Versatility (1)

Reasons it was not 5-star experience (N=19)

4-Star (N=16)	• Defective device (1) – “The closure unfortunately broke out and did not hold anymore, so that a replacement of the accessories was no longer possible properly” • Weight (1) • Noise (1) • Design (1) • Oval Brush size (1) • Ventilation location (1) – “I cover the ventilation when blow-drying”
3-Star (N=3)	• Styling time (1): I usually style my hair and get them ready faster, moreover some accessories are just not practical for me. • Curlers don’t hold (1) • Performance (1) • Accessories styling results (1) • Noise (1) • Attachments get too hot (1)

Purchase interest Unpriced		Priced €349.99

Intent in Purchasing Chanel priced at €349.99		Issues / Reasons Not Interested
Definitely would buy	5	• High build quality (6) • Versatility (5) • Space saving (4) • Performance (3) • Concentrator (1) • Price/ Performance value (1)
Probably would buy	11	
Not sure	7	• N/A
Probably would not buy	6	• Price/ Performance value (9) • Styling results (1)
Definitely would not buy	4	

Unfortunately, blow-drying and styling do not meet my expectations. The device is very loud and beeps very unpleasantly - especially without attachment. The hair dryer does not dry the hair nearly as fast as my old device. All attachments used do not reflect the performance of my old devices - the result unfortunately always hangs behind. In addition, the attachments remain hot for too long. The handle of the device is unfortunately also not optimal, because you come back to the keys again and again when blow-drying and then adjust the temperature, or get to the blower.

Key Insights:

- The most critical opportunities for improvement are with the noise during use and surface temperature of accessories ≤ 61%.
- Attach/ Detach of accessories and diffuser performance have both scored lower compared to W2

Level of Satisfaction (1-7)	Areas of concern	Flip functionality	Grip Comfort	Weight in hand	Noise during use	Speed of Drying	Speed of Achieving End Style	Ease of Use- Buttons	Attach/Detachment Accessories	Surface temperature of the main unit	Surface temperature of accessories	Air flow temperature - settings	Overall Performance	Curlers performance	Oval brush performance	Paddle brush performance	Concentrator performance	Diffuser performance

Reasons for Neutral / Bottom 3 Box Scores				
Noise during use	Attach/ Detach of accessories	Surface temperature of accessories	Curlers performance	Diffuser performance
Noise too loud (11)	- Attachments get hot (2): <i>The attachments are very hot. You have to be quite careful. You can't put them away directly.</i> - Faulty unit (1): <i>Very disappointed because the closure jumped towards me when attaching the paddle brush, and then it did not hold anymore.</i>	Accessories are too hot after usage (11)	- Curls don't last (5) - Size (1): <i>not long enough for long hair</i> - Accessories get too hot (1)	Achieving results (2): <i>My hair didn't get curls but looked a bit straw/ didn't manage to get the desired results</i>

Key Findings

- Concentrator and diffuser are the attachments that have registered the highest experience satisfaction marks.
- The curler accessory proves to have the most opportunity for improvement.
- Curlers and concentrator are seen as the most useful Shark accessories the test HD comes with

	Curlers	Oval Brush	Paddle Brush	Concentrator	Diffuser
Experience (T2B – Very good/good)	88%	85%	88%	64%	79%
Performance					
Same as current	60% (N=20)	33% (N=11)	48% (N=15)	53% (N=17)	52% (N=13)
Better than current / Faster than current	21% (N=7)	33% (N=11)	16% (N=5)	19% (N=6)	24% (N=6)
Worse than current / slower than current	12% (N=4)	15% (N=5)	6% (N=2)	3% (N=1)	8% (N=2)

Key Findings

- According to N=7 testers the experiencing using the curlers was nor good due to curls that don’t hold long enough, long hair not grabbed by the curlers and incorrect usage od the device
- Most testers (43%) have said that the curls have lasted for a few hours and 21% that they would expected the curls to last longer.

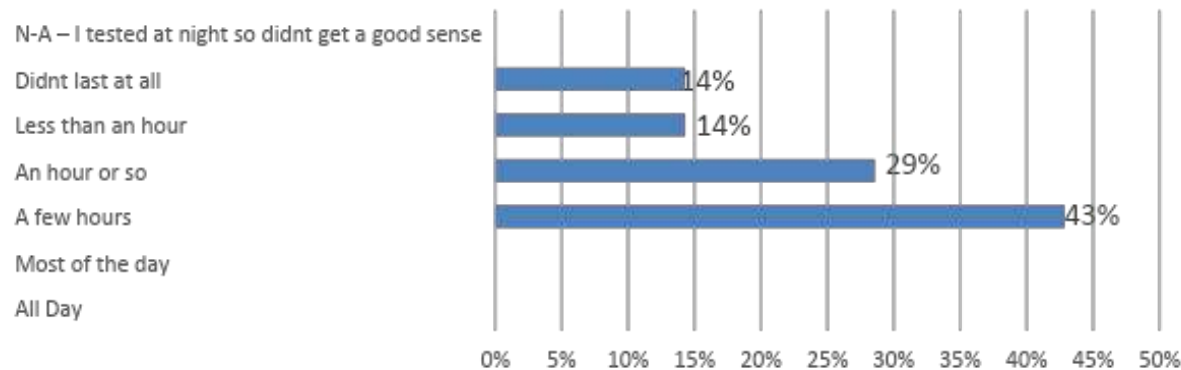

How do these curler accessories compare to your current curler styling tool, if you have one?

Same as my current	0	0%
Better than my current (please explain)	1	14%
Worse than my current (please explain)	5	71%
N-A I dont currently have a curler styling tool	1	14%

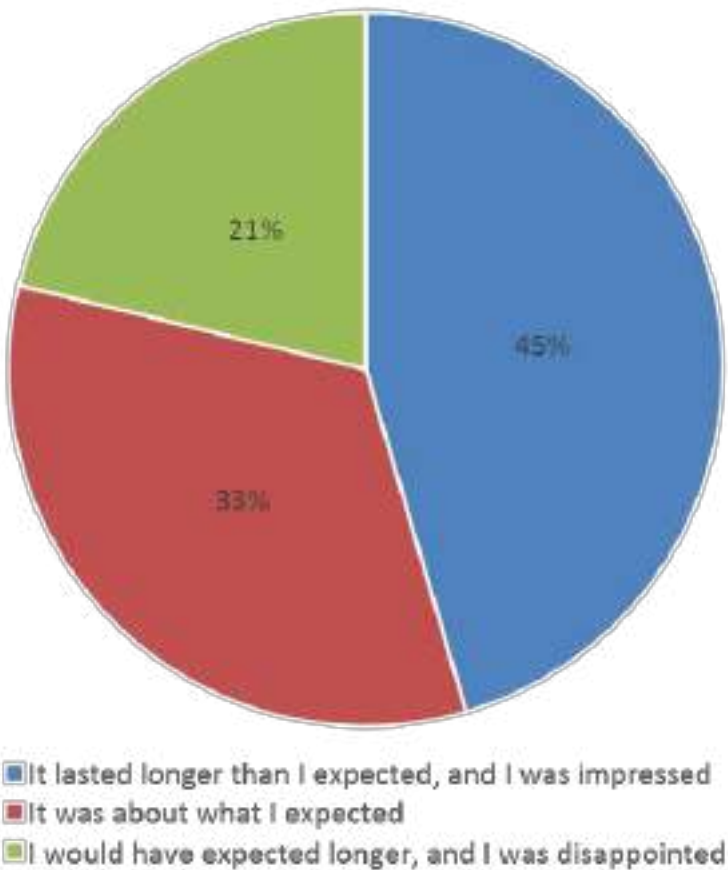

Please tell us why your experience was not good when using the curlers.

- Curls don't hold (4)
- Device usage (2) : *I think I am not using the device properly. Sometimes I do not get to the cold button very well and sometimes I do not get nice curls.*
- Long hair (1): *I have long hair and unfortunately the curls don't hold*

How long did the curls last?

How do you feel about the amount of time the style lasted?

Key Findings

- According to N=5 testers the experience using the oval brush wasn’t good because of the size of the accessory (too big), Hair becoming frizz and unsatisfactory styling results.
- Only N=1 tester has experienced some discomfort on the scalp due to bristles feeling very rigid and scratching the scalp
- N=3 testers also experienced their hair getting caught in the oval brush

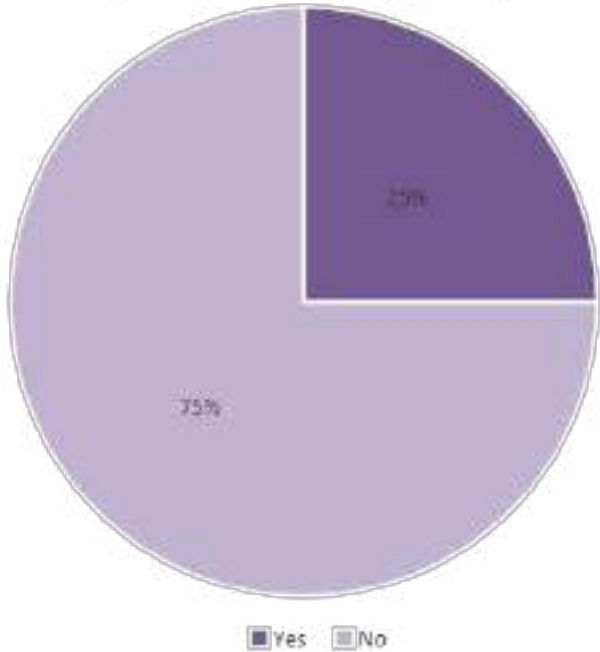

How does this oval brush accessory compare to your current curler styling tool, if you have one?		
Same as my current	0	0%
Better than my current (please explain)	0	0%
Worse than my current (please explain)	2	50%
N-A I dont currently have a curler styling tool	2	50%

Please tell us why your experience was not good when using the oval brush	
• Size (2):	<i>The oval brush is simply too big for me, and I can't bring any volume into my hair.</i>
• Frizz hair (1):	<i>The bristles charge my hair statically, so that the hair only flies around and can no longer be styled.</i>
• Styling results (1):	<i>straight-slightly wavy hair, unfortunately I did not notice any difference. I wouldn't call a bad experience; it just wasn't anything overwhelming</i>
• Hair get stuck in the brush (1)	<i>the oval brush is very large and, in my opinion, only suitable for very long, thick hair. It also pulls the hair a lot getting stuck in my hair.</i>

Did you experience any bristles discomfort on your scalp?			
Yes	1	25%	<i>The bristles feel rigid on the scalp and scratch it</i>
No	3	75%	

Did you experience your hair getting caught anywhere in the oval brush accessory?			
Yes	3	9%	• Tangled Hair (2): <i>few hairs always get tangled on the edge of the brush. However, this happens with every brush.</i> • Long hair (1): <i>Yes, because I have long hair, my hair quickly got caught in the brush. So that I only use the brush at the base and can work on the ends of the strands.</i>
No	30	91%	

Do you feel you were able to easily access your roots?

Did the oval brush accessory fall off during use?	
Yes	0%
No	100%

Key Findings

- N=3 testers didn’t have a nice experience using the paddle brush due to the poor styling results obtained. N=1 tester also found the bristles very scratchy and rigid on scalp.
- N=1 testers didn’t notice any difference in the HD when using the concentrator, N=1 finds the air flow too strong and N=1 prefers the HD without the concentrator.
- N=2 testers are not satisfied with the styling results and N=1 didn’t use the diffuser because of hair straight hair.

How does this paddle brush accessory compare to your current curler styling tool, if you have one?

Same as my current	0	0%
Better than my current (please explain)	0	0%
Worse than my current (please explain)	1	33%
N-A I dont currently have a curler styling tool	2	67%

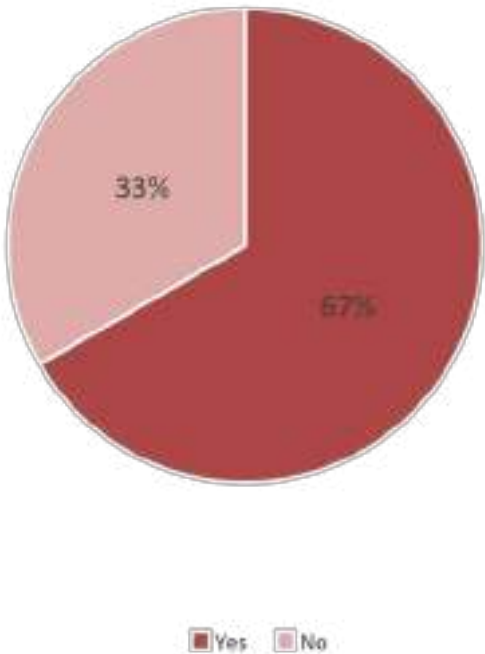

Please tell us why your experience was not good when using the paddle brush

Styling results (3): The paddle brush did not straighten my hair and it also statically charged them. It was not possible to style my hair. With a volume spray, it got a little better, but not perfect.

Did you experience any bristles discomfort on your scalp?

Yes	1	33%	I found them very scratchy and rigid on the scalp
No	2	67%	

Do you feel you were able to easily access your roots?

Please tell us why your experience was not good when using the concentrator

- No difference with/ without (1): I don't notice any difference with or without
- Air flow (1): For me, there is too much air flow, and it is too concentrated - it does not reach a large area to dry
- Prefer without (1): I prefer to blow-dry without a concentrator

Please tell us why your experience was not good when using the diffuser

- Styling results (2): Even after several attempts, I could not make curls with the diffuser. My hair looked more like I hadn't combed it and a bit unkempt (straw).
- Haven't used (1): I didn't use it because I have straight hair

Did you experience any discomfort with the air temperature on your scalp while using the diffuser accessory?

Yes	2	8%
No	23	92%

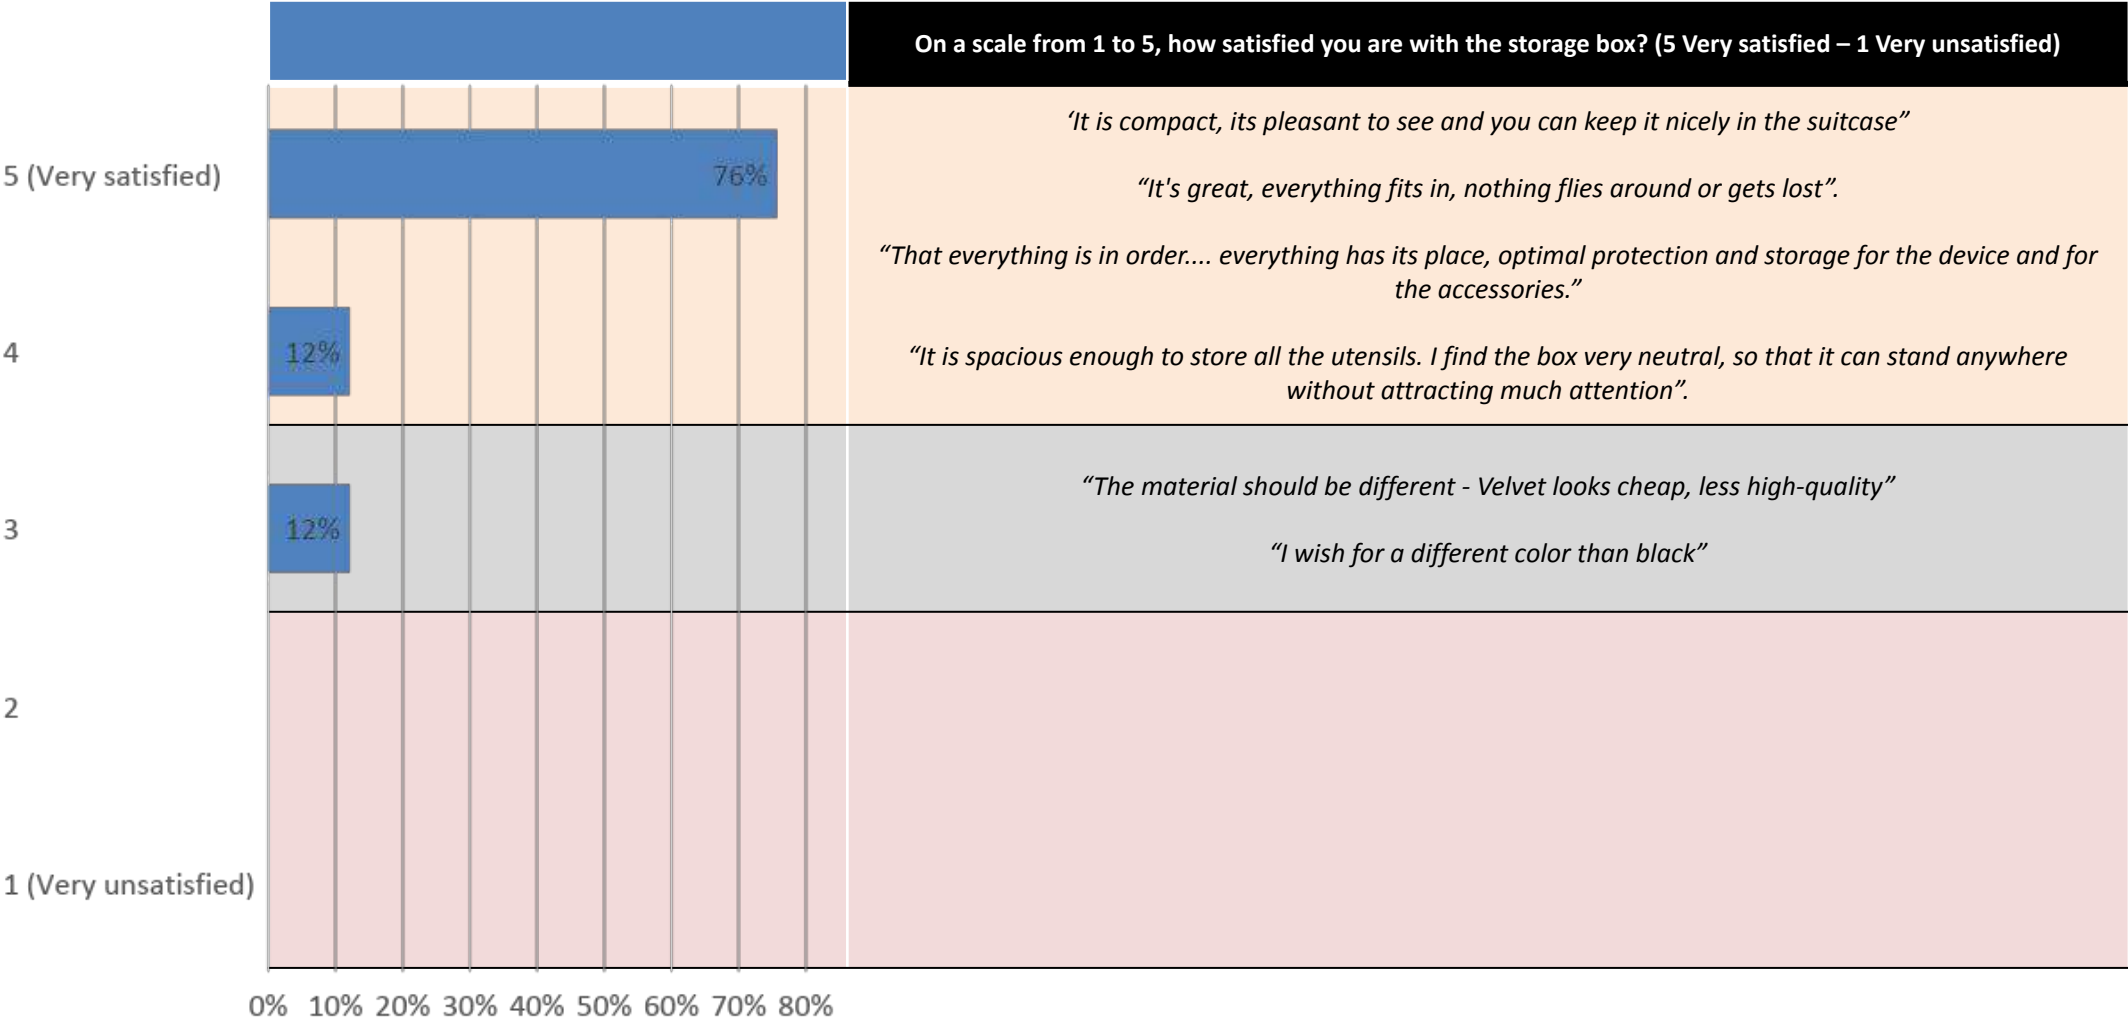

What temperature setting were you using with the diffuser accessory when the issue occurred?

- Medium
- High

Key Insights:

The most critical opportunities for improvement for the storage case are around its Color and Materials. However, most testers are very satisfied with the storage box

Week 3: 4.3 Stars

CI POV: Star rating remains consistent with previous weeks as testers continue to enjoy their FlexStyle experience. Noise and curl longevity continue to be the most common complaints among DE consumers.

- Curl longevity continues to appear as an issue among DE consumers – consistent with feedback we’ve seen in other markets.
- Accessories getting hot is a concern to a few testers who are suggesting to use a different material.
- N=2 testers are complaining about “greasy results” [1 is the same tester that raise the concern in W2]
- N=1 tester has a default unit - broken closure clips [the unit has been recalled back]

Star rating				
	1 st Use	WK 1	WK 2	W3

	W2	80%	-	86%	93%	71%
	W1	70%	81%	77%	100%	87%

Reasons it was not 5-star experience

4-Star (n=14)

- Too many accessories (1): *Half would be enough for me.*
- Aesthetic (1): *It looks like cheap plastic*
- Frizz hair (1): *After blow drying the hair they become frizz [Remington HD]*
- Curls longevity (1)
- Accessories get hot (1)
- Air flow (1): *It is very hot in level 2 when blow drying [Dyson HD]*
- Brush bristles are too big (1)
- Noise (1): *too loud*

3-Star (n=4)

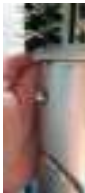

- Curls longevity (3)
- Greasy hair (1): *Hair becomes greasy faster when using the device as an HD.*
- Paddle brush performance (1)
- Closure clip broken (1): *I wanted to straighten my hair and when the paddle brush snapped into place, the closure clip jumped towards me. Now this no longer holds the accessories which are difficult to insert. I am completely satisfied with the actual performance of the device, however the fact that after such a short time a defect arose has somewhat mitigated my experience.*
- Noise (1)
- Accessories get too hot (1)

The device could be quieter. In addition, the attachments get quite warm and my hair **greasy faster** - I usually wash my hair every 2-3 days. Since using the styler I have to wash it after 2 days and already the following day the hair appears flatter and looks and feels greasier. I use the same shampoo and conditioner as usual and no serum or similar."

Hair are frizz after blow drying them

Closure clip broken

- Key Insights:**
- DE consumers used the oval brush and the curlers more during Week 3 with the Diffuser being the one used the least (41%).
 - While both Diffuser and Curlers have been used more than previous weeks, testers are still concern about the first performance results and time it takes to achieve them and the latter curls longevity, design and temperature
 - Out of 19 respondents who towel dry and then rough dry their hair without attachments, to n=5 it took around 5 minutes to dry their hair. Only n=1 said the drying process lasted about an 1h.

Desired Improvements	• Size (3) • Bristles (2): <i>they should be thinner</i> • Performance (2): <i>results do not last / it takes time until satisfied with the results</i> • Material (1) <i>Change the material to avoid static charge</i> • Weight (1): <i>With oval brush attached, the device is heavy</i> • Accessory's temperature (1): <i>it gets warm</i> • It tangles hair (1) • Hair can only be dry (1): <i>The hair must not have any residual moisture, as they can only be styled with the oval brush when properly dried.</i>	• Size (3) • Static charge (1) • Performance (1): <i>It hardly straighten the hair</i>	• Accessory's air flow temperature (1): <i>It's too hot for my scalp because hair greases faster than usual [Phillips Tvp HP8232 & Remington Modell S2002]</i>	• Performance (1): <i>I can't get curlers with the diffuser</i> • It takes time to get the desired results	• Curls longevity (3): <i>They could last longer</i> • Design (2): <i>A different design thicker or longer is desirable.</i> • Curler's confusion (1): <i>Don't understand which curler is left and which one is right</i> • Accessories temperature (1): <i>The attachment doesn't get hot enough</i> • Usage concern (1): <i>Don't know how to use it properly</i> • Material (1) • Accessories temperature (1): <i>they get too hot</i>

Did you towel dry and then rough dry your hair without attachments?

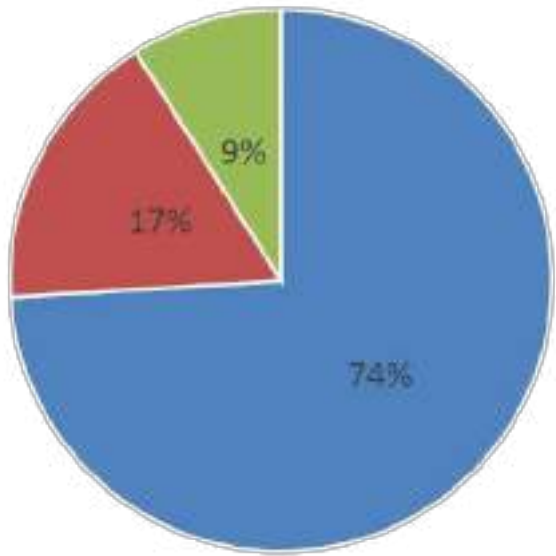

1-2 minutes (2)
2-3 minutes (2)
5 minutes (5)
7-8 minutes (2)
8 minutes (1)
10 minutes (4)
15 minutes (1)
30 minutes (1)
1 h (1)

Key Insights:

- According to 74% of DE consumers the experience using Shark unit has been better than expected in terms of overall performance, range of features, easy handling and high build quality
- Only n=3 have said their experience has been worse than expected due to the unit difficult styling performance, long dry timing and curls longevity.
- Consumers have also experienced some limitations around curlers, brushes, weight and accessories getting too hot.

Now that you have had more time with your Shark FlexStyle, how has your experience been compared to your initial expectations?

- Better than expected
- As expected
- Worse than expected

Better than expected (n=25)

- Performance (11): *Hair shines beautifully*
- Range of features (7)
- Fast blow drying (6)
- Easy handling (4)
- High build quality (4)
- Easy to use (3)
- Hair look (3): *It ensures more volume*
- Variety of accessories (3)
- Attachments are easy to attach (1)
- Paddle brush performance (1)
- Versatility (1): *From hair dryer to styler*

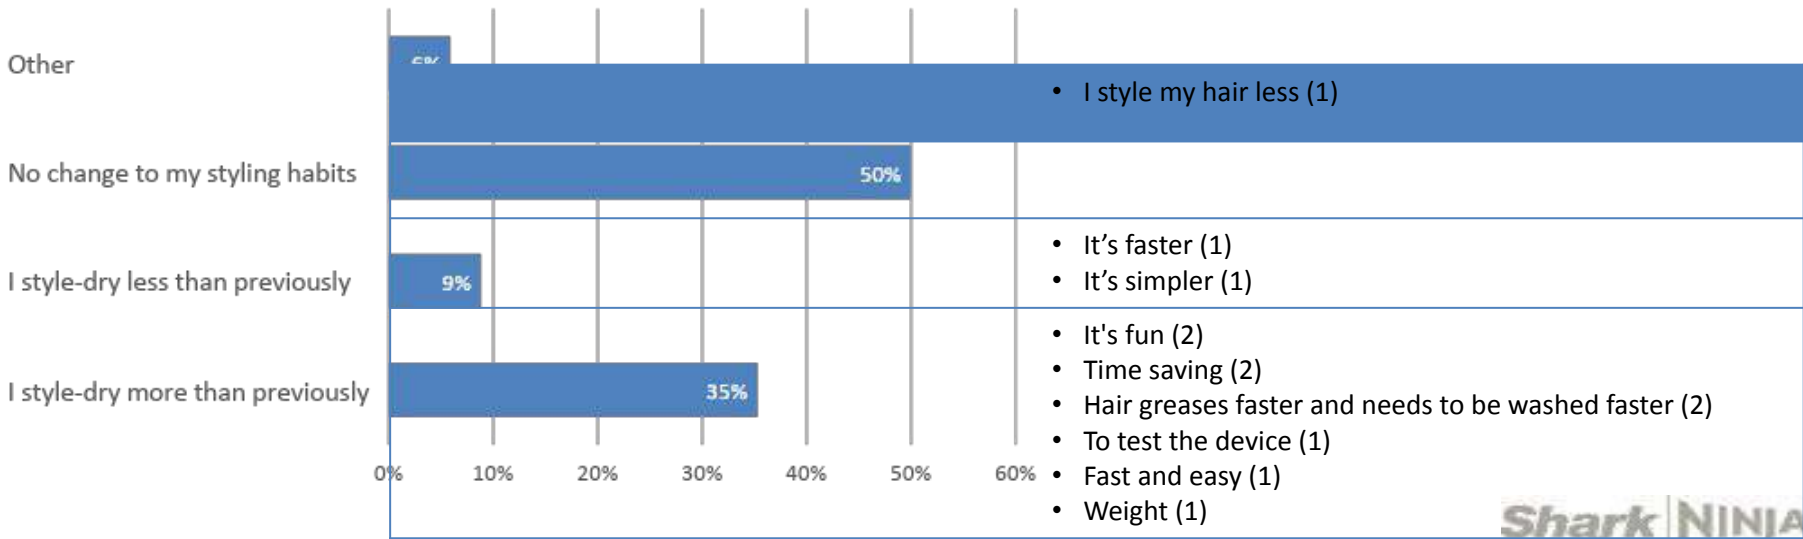

Worse than expected (n=3)

- Curls longevity (1)
- Time consuming (1): *It takes time to get the expected results*
- Styling performance (1): *Styling is difficult with the curlers*

Did you experience any limitations with the Shark FlexStyle? Were there any hair stylers you were unable to achieve?

- Curls longevity (5)
- Accessories get hot (1)
- Weight in hand with the accessories (1)
- Usage difficulties (1): *I had to practice a few times how to use the curler*
- Time consuming (1): *It takes time to blow dry the hair*
- Oval brush performance (1)
- Oval brush size (1)

Have your hair styling habits changed in any way?

Key Insights:

- Most testers haven’t read any of the materials included finding the device easy to use and to interact with after a few weeks of usage.
- Most video tutorials have been considered useful and informative however, the video tutorial on oval brush and curlers have been considered the most useful.

Did you review any of the following materials included with your product this week?

Welcome Insert	5	15%
Style Guide	12	35%

What was your experience using the Video Tutorials for the

Oval Brush

Paddle Brush

Diffuser

Curlers?

- Helpful (1): *I found it very helpful and hope that more videos will be made that could help styling*
- Good explanation (1): *I wanted to know why I was not getting so much volume in my hair. Then I saw that I was doing everything right and I couldn’t get enough volume due to the structure of my hair. I have also noticed that because of the length of my hair, they sometimes get tangled up because of the length. In my case, I would recommend using the accessories and style my hair when dry.*
- Helpful (1)
- Helpful (1)
- Helpful (1): *I found the tutorials for the curlers very good and helpful. There was nothing to improve, the instructions were very understandable and practical.*
- Clear (1)

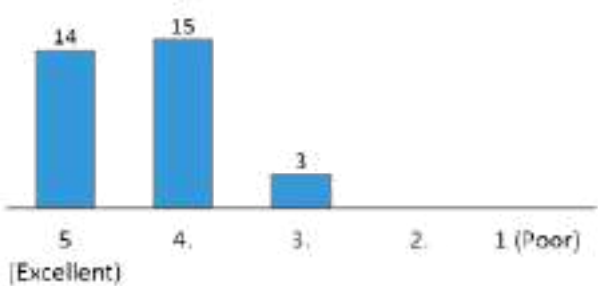

Week 2 – OGS: 4.3 stars; NPS +56; ADS: 4.5.

CI POV: Star rating remains consistent with previous weeks as testers continue to enjoy their FlexStyle experience – star rating distribution has also remained the same this week. Noise and curl longevity continue to be the most common complaints among DE consumers.

- Curl longevity continues to appear as an issue among DE consumers – consistent with feedback we’ve seen in other markets.
- Noise is scoring poorly on this week’s scorecard, with one tester reporting it as a start detractor.
- One tester is complaining of “greasy results

Star rating: 4.3

Storage Insights	
In a drawer-cubby in my bathroom	13%
In the storage box	50%
On my dresser	27%
Bathroom	10%

“I’ve been drying with the naked hair dryer and it seems to be making my hair very greasy”

[Dryer:Rowenta Instant dry ionic Modell CV6030
Curler: Aldi Grundig Selection HS 4021, GMK 0450]

Reasons for 5-star experience

- Easy to use (8)
- Versatility (5)
- Overall performance (3)
- Happy with end style (3)
- No hair damage (3)
- Fast drying (2)
- Hair health (1)
- Lightweight (1)
- Aesthetics (1)

Reasons it was not 5-star experience

4-Star	• Longer lasting curls (2) • Accessories too large (brushes + curlers) (2) • Storage (1) • Cable box inconvenient (1) • Smoother results (1) • Power cord colour (1) • More styling guidance (1) • Improve air flow (1) • Less greasy results (1) • Aesthetics – more premium (1)
3-Star	• Some irrelevant accessories (1) • Noise (1) • Curl longevity (1) • Weight in hand (1)

- Grip comfort is scoring poorly – testers are mostly reporting concerns with button location, suggesting they sometimes have difficulty reaching the buttons or accidentally hitting them – this does not appear as a star detractor.
- Curler performance is a complaint for the scorecard – this is also reported as a star detractor – we should provide more guidance in collateral and through online videos to help consumers hold their curls.

Areas of concern	Flip functionality	Grip Comfort	Weight in hand	Noise during use	Speed of Drying	Speed of Achieving End Style	Ease of Use-Buttons	Attach/Detachment Accessories	Surface temperature of the main unit	Surface temperature of accessories	Air flow temperature - settings	Overall Performance	Curlers performance	Oval brush performance	Paddle brush performance	Concentrator performance	Diffuser performance

Reasons for Neutral / Bottom 3 Box Scores

Grip Comfort	Noise during use	Speed of achieving End Style	Curlers performance
- Button positions (4) - It could be narrower (2) - Slippy (1)	- Shrill, high tones (2) - Loud (6) "starts loud but seems to get better" (1)	- Not as fast as a curling iron (2) - Hair dryer is fast, but styling is slower (1) - Cool shot isn't cold enough (1) - Harder with thick hair (1) - Sometimes hard to achieve end style (1)	- Curls do not last (6) - Curlers' design (1) - Accessories get hot after usage (1) - Curls are too big (1)

Week 1 Star Rating: 4.3 stars

CI POV: Star rating sits at 4.3 (=FU); consumers are gaining confidence with their Chanel unit appreciating its ease of use, drying and styling performance. This is expected to further increase throughout the next few weeks. Areas for improvement are around the curlers and brushes performance, which don't satisfy consumers achieving their desired look.

- Curls that don't last drive the highest dissatisfaction among consumers who find using warm and cold air to fix them time consuming.
 - Noise is a star detractor perceived too loud by N=4 and by N=1 'unpleasant while in use'.
 - All testers have used at least one accessory, with curlers and oval brush being the most used. However, the concentrator and the diffuser are the attachments that drive the highest satisfaction
- More than half of the sample size (64%), Chanel HD dries faster than their current tool.

Star rating		
	FU	W1
5 stars	15	14
4 stars	14	15
3 stars	2	5
2 stars	2	0

Reasons for 5-star experience

- Dryer performance (6)
- Easy to use (6)
- Styling performance (4)
- Handling (4)
- Attachments (2)
- Fast dry (2)
- Time saver (1)
- Lightweight (1)

Reasons it was 4-star experience

- Curls don't last (4): *The curls I made with the accessories did not last long. It was time-consuming to make them first with warm air and then with cold air. They looked great when they were done, but they only lasted about 1 hour.*
- Attachments & Device get hot after usage (3)
- Noisy (2)
- Bristles too hard (1)
- Air temperature (1): *Even on the lowest setting is very hot*
- Aesthetic (1)
- Styler performance (1): *Straightener is still needed*
- Frizz hair (1): *The brush frizzes the hair due to its small bristles*

Reasons it was 3-star

- Noise (2)
- Drying performance (1): *Slower than current HD* [Phillips]
- Heat buttons (1):
- Styling performance (2)
- Usage (1): *Can only use it partially* [diffuser and concentrator]
- Curls don't hold (1): *I tried it with curly foam, spray etc., unfortunately same results each time: the curls are gone within half an hour.*
- Weight (1): *When using the device + the brush, the device is too heavy*
- Oval Brush performance (1): *I get a better outcome when using the hair dyer + the brush*
- Diffuser performance (1): *the curls looked strawy*
- HD performance (1): *Better than styler*

4 Stars: Great device! I wish curls could last longer

Issues that are not star detractors

- Attachments get hot after usage (6): *Changing curlers from L to R (or vice versa) is not possible without gloves or the similar due to them being too hot while using the device.*
- Noise (3):
- Curls don't hold (3)
- Attachments size (2)
- Motor location (2)
- Weight (2)
- Size of the device (1)
- Paddle brush performance (1)
- Heat button's location (1)
- Attachments cheap look (1)
- Handle (1): *It should be more ergonomic*
- Oval brush performance (1): *It leaves hair frizz*

3 Stars: The styler should be lighter, so that you can use it properly with the oval brush. I don't know why the curls disappear after half an hour; with the Dyson air wrap that doesn't happen. Even the paddle brush does not really make the hair smooth. The brush would probably have to be reworked a bit, so that the bristles can really straighten the hair.

Accessory Use Insights

% have used accessory	79%	79%	68%	47%	44%
Experience (T2B – Very good/good)	70%	81%	77%	100%	87%

Key Findings

- All testers have used at least one accessory, with curlers and oval brush being the most used.
- Concentrator and diffuser are the attachments that have registered the highest experience satisfaction marks.
- The curler accessory proves to have the most opportunity for improvement.
- For a little over half of the sample size (64%), Chanel HD dries faster than their current tool.

Attachment Specific Insights	• Curls don't last (4): <i>Soon after the application I had great curls which, however, disappear completely after a few hours (possibly also my mistake, since I have very straight hair. However, it works with other devices</i> • Curlers are hot (1): <i>I often panicked because I was afraid of burning and-or not being able to loosen my hair</i> • Time consuming (1): <i>It is time-consuming to change from hot to cold air to fix the curls. When need to swap from L to R (or vice versa) need to be careful not to get burned.</i> • Styling (1): <i>unable to reproduce curls</i>	• Performance (3): <i>Hair was not properly smooth, and tips were not round / The hair somehow always looked messy and strawy.</i> • Weight (1): <i>The styler was simply too heavy with the brush and not easy to handle.</i>	• Performance (3): <i>The hair did not become smooth with the paddle brush, It was rather statically charged and could not be styled afterwards.</i> • Size (1): <i>too big and globular</i>		• Performance (1): <i>My hair didn't look curly but strawy and no longer shiny. I couldn't get a good result with styling foam either.</i> • Dry time (1): <i>The hair took a very long time to dry</i>

First Use Star Rating: 4.3 stars

CI POV: Many consumers are experiencing a learning curve at first use resulting in a 4.3 star rating, giving us confidence that their experience will improve over time. The style and design of the device, its versatility and ease of use are, so far, the main delighters for this product.

- **Scorecard:** DE respondents are particularly praised by the flip functionality, the overall performance and the dynamic of attaching/detaching the accessories. The most critical opportunity areas include the **weight** and **noise** during use, **surface temp of accessories** after use and **speed** at which it delivers dry hair as well as desired styles. Testers also noted that along with **grip discomfort** and **curlers performance** dissatisfaction.
- Most testers feel confident when interacting with the device and found the interaction easy (65%). The how to videos are not being utilized by many with testers preferring the Style guide.

Star rating	
5 stars	15
4 stars	14
3 stars	2
2 stars	2

Reasons for 5-star experience

- Style and design of the device (6)
- Versatility (5)
- Easy to use (4)
- Storage case (4)
- High quality (2)
- Flex technology (2)
- Performance satisfaction (2)
- Handling (2)
- Weight (2)
- Noise (1)
- Learning curve (1)
- Powerful airflow (1)
- Accessories Lock/ Unlock feature (1)

Reasons it was not 5-star experience

4-Star (n=14)	• Learning curve (4) • need to use it more (2) • guideline must be read (1) • description and features are a bit complicated (1) • Weight (3) • Noise (3) • Curls fell out quickly (3): <i>curls do not really last long, but that happens with the Dyson. It is probably due to drying the hair with warm air since when using curling irons, the curls hold and for long.</i>	• Packaging (2) • Handling (2): <i>the device is not so heavy, but it does not fit well in the hand.</i> • Smoothing performance (2): <i>Had to smooth the hair with my current hair dryer + brush / it makes the hair only semi – smooth (brush)</i> • Diffuser performance (1): <i>The first impression of the diffuser is not completely convincing but quite good. The hair got a little curls but rather strawy appearance and not really nicely curled. With the curling irons the impression is a bit better.</i>
3-Star (n=2)	• Noise (1): <i>the sound is very unpleasant, although not extremely loud but garish in tone.</i> • Heat buttons (1): <i>If I want to switch down from the heat from 3 to 2 levels, this is not possible, and it starts again at heat level 1.</i> • Accessories get hot after usage (1): <i>almost impossible to remove it to store it</i> • Not as powerful as her current dryer (1) [GHD owner] • Poor build quality (1)	
2 – Stars (n=2)	• First impression (1): <i>First impression was just not super great.</i> • Unwieldy (1) • Curls fell out quickly (1) • Noise (1) • Frizz (1)	

Experience Insights

Successful experience (very/somewhat)	93%	
Successful experience (slightly)	7%	• Weight (2) • Handling (1) • Curls fell out quickly (1) • Noise (1) • Frizz Hair (1)
T2B Ease of Interaction (CES)	67%	
T2B Confidence	90%	

The device is very heavy and weird in hand. I couldn't do curls properly and the ones I managed to do felt out after 1-2 minutes. The airflow is extremely loud therefore unpleasant to hold the device nearby the ear for about 20 seconds. When I wanted to straighten my hair with the round brush, this did not work properly as my hair electrically charged.

Issues that are not star detractors (n=16)

- Noise (4)
- Smaller PKG (3)
- Device Color (3)
- Higher Build quality (2)
- Brush (2)
- Curling irons (2)
- Faster results when blow drying (2)
- Ventilation located somewhere else (1)
- Device must not get hot (1)
- Weight (1)

- DE respondents are particularly praised by the **flip functionality**, the **ease of use buttons**, **attach/ detachment of accessories** and **air flow temperature settings**.
- The main elements of concerns are related to the **grip comfort** (main body of the unit could be narrower and the ventilation location could be re- considered), **noise during use** (too loud that causes beep in the ear for long after usage), **speed of achieving End style** (slower than current HD/ curler), **surface temperature of accessories** (too hot to remove after usage), **curlers performance** (curls don't last) and **paddle brush performance** (it doesn't smooth the hair).

Areas of concern	Flip functionality	Grip Comfort	Weight in hand	Noise during use	Speed of Drying	Speed of Achieving End Style	Ease of Use-Buttons	Attach/Detachment Accessories	Surface temperature of the main unit	Surface temperature of accessories	Air flow temperature - settings	Overall Performance	Curlers performance	Oval brush performance	Paddle brush performance	Concentrator performance	Diffuser performance

	(3621) The stylings didn't work or last: The curling iron didn't grab the hair properly and curls didn't last. The brush did not really smooth the hair	First Use, W1, W2, W3	- Consumer education /learning curve/Styler - How to video will help educating the consumer – Ci will monitor it	CI/PD/PM	W1	I would return my product	HIGH
	(3608) The device provides simple and very nice results, but the main body is too long and I would like it to be slightly shorter. In this way it will also be handier.	First Use	No action - Ci to follow up with the tester if she managed to use the device folded or not. I mean that the body of the device is a bit long for my taste. Especially when it comes to turn curls, I had to "rotate" the device quite a bit at the beginning before getting used to it.	CI	W1	I would not take any further action. Its not a major issue or concern; I just want to help point out room for improvement	LOW
	(3630, 3605, 3625) Noise	First Use, W1, W3		ENG	W1	I would return my product	HIGH
	(3630) Length of the handle	First Use, W1	No action – looking to implement this configuration on future projects	-	W1	I would not take any further action. Its not a major issue or concern; I just want to help point out room for improvement	LOW
	(3630) Buttons location	First Use, W3	No action - Ci to follow up on which accessory has been used and to monitor it In both modes, the buttons bother me...but mainly when using it flex as a hair dryer. Especially the cool function button... I always press on it by accident.	CI	W1	I would not take any further action. Its not a major issue or concern; I just want to help point out room for improvement	LOW
	(3630) Ventilation location	First Use	No action – CI to monitor it	CI	W1	I would not take any further action. Its not a major issue or concern; I just want to help point out room for improvement	LOW
	(3621, 3630, 3622, 3633) Chanel takes longer than old device to dry	First Use	Monitor it – CI to follow up with testers on the exact serial number of their current device	CI	W1	Star Detractor	HIGH
	(3621, 3630, 3633) Curls are not as good as with the old device	First Use	- CI to follow up with testers on the exact serial number of their current device - Collateral to be updated to further educate consumers □ dryer that styles	CI	W1	Star Detractor	HIGH
	(3625) Device is heavy	W1	No action – CI to follow with the tester if she complain about the weight of the unit because getting tired while using it or because it just feels heavy on hand	CI	W2	I would look through the content provided- online for a solution	LOW
	(3625) After usage the device and the accessories are hot	W1, W3	Ci to follow up on which accessory was the tester using and from where was she grabbing it?	CI	W2	I would return my product	MED
	(3598, 3603) When using the device in flex mode, it is too short: <i>When my husband uses the device to blow dry his hair, he holds it from very nearby the motor and covers it./ Maybe because I have big hands but when I use the device in flex mode to blow dry my hair, I feel main body of the device is just too short.</i>	W1	Ci to follow up with PD on actions to implement	PD	W2	I would not take any further action. Its not a major issue or concern; I just want to help point out room for improvement	LOW
	Causing greasy hair	W2, W3			W3		LOW

	Issue	Where did we hear it?	Action	Owner	Timing	Influence on in-market performance (based on CE legacy learnings & IHUT)	Risk Level (w legacy vs. new identification)
Product	I think that the lower buttons should be slightly higher to be easier to reach during styling. I accidentally press the cold button again and again, because I did not notice that I was pressing it. Here you could provide a little more haptics, so that who uses the device notices when pressing the button. The description could be revised a bit, for me it did not work using warm air for 10 seconds and cold air for 10 seconds. After trying couple of times, I can say that 20-30 seconds of heat and 10 - 20 seconds cool down works better than only 10 seconds as in the description. I solved the frizz hair using brushes and a volume spray (almost) with this tactic hair are not frizz as much. Maybe you could still work on the material of the brushes so that the charging no longer happens.	W3	• No action • No action - Times can vary from person to person				
	Greasy hair (1): <i>Hair becomes greasy faster when using the device as an HD.</i>		<i>"I can't really explain it. At first I thought that the hairdryer might be getting too hot.</i> <i>I have always used a heat protector. My hairdryer also has a centering device, so that's not new either.</i> <i>I usually wash my hair on Sundays and then not again until Wednesday. With the new hairdryer, I noticed that I already have to wash my hair on Tuesday. Sometimes I had to use dry shampoo because the roots are flat and look greasy. The rest of the hair is normal. I had dried my hair 2 times again with my normal hairdryer to make sure it was the unit and not the autumn season or whatever. With my old unit, everything is back to normal even when I style my hair afterwards."</i>				

Star Rating	ID	Hair Dryer – Blow Dryer	Hair Straightener	Flat iron	Curling wand	Curling iron	Verbatim
4 Stars	3598	Grundig	Philips Type HP8650	Babyliss 220V-50HZ 90W	Severin Typ6807		It's probably not possible to locate the ventilation somewhere else. When attachments are on, the handle becomes large enough and it's handy to use. The problem is only when there is no attachment on the unit - with blow-drying the hair.
	3600	Remington D5706		Remington Pro Ceramik S5505	Remington pro soft Curl Ci6325		I would have preferred a simpler PKG to be able to start straight away.
	3602	Remington 19117SL	GDH No. BIC002	Babyliss 4x4 crimper	Dyson Air Wrap Serial number: F4G-EU-RAJ0824A	Babyliss 4x4 crimper	Maybe change something on the smoothing brush so that the hair is really smooth and does not look strawy. Curling irons should also be reworked so that curls last longer. Then I could give the 5 stars. I will continue to test it and try the curling irons with a curly cream or foam, maybe it will be a little better.
	3603	Philips Typ HP8232		Remington Modell S2002			
	3605	Rowenta Instant dry ionic Modell CV6030			Aldi Grundig Selection HS 4021, GMK 0450		It should be quieter
	3607	Philips Dry Care Advanced HP8233/00R1					It should be smaller and quieter
	3608	Philips ThermoProtect 2200W		GDH 5.0 Jemella Limited		Babyliss C260E	Unfortunately, too heavy.... when travelling with the hand luggage it fits but it's too heavy
	3610	GHD
